Hi Tony,

I think we met as well. A few weeks ago I was in your library (with my family) and we spoke about adding documents to the CFAC Superfund information repository. Like Mike said, we are compiling a set of documents to be delivered to you. I will send those via mail on a dvd and I will include hardcopies of a few of the key resources as well. You should receive those next week. I had wanted to hand deliver these, but I probably will not make it back to Columbia Falls for a few weeks. I hope mailing these to you will be fine in the short term. I should be up again before the end of the year or soon thereafter.

I am CC'ing Steve Wright from CFAC on this email as well. We will work together to ensure we build the information repository to meet community information needs moving forward. Any feedback you may receive from interested people along the way will be warmly appreciated.

Most of these resources can also be found on our website  
<http://www.epa.gov/superfund/columbia-falls>. Let me know if you have any questions. Thanks for following up!

Hello Tony,

I am copying Robert Molee our Community Involvement Coordinator. He is working on getting these documents together. You can work with him on this.

Thanks for your note and assistance

Mike

Hello Mike!

You're in the newspaper, and we can tell!

We're starting to get more questions from the public about the EPA documents related to the AAC/CFAC Superfund Site. I believe you are the gentleman I spoke with about housing EPA documents here in the Columbia Falls library?

We would gladly accept and make available any such documents you have. Please let me know what you have and when you may be able to get them to us. I've been keeping track of interested parties and will notify them when we have the documents in question.

Thanks Mike!

Tony Edmundson
